

Partnership that unlocks your CDMO's potential

Experience, innovation, and flexibility to support you in exceeding client expectations

CDMOs must balance providing their clients with faster development timelines, greater scope flexibility, and access to innovative technologies, all without compromising the quality of the therapy. With our industry experience and connected capabilities, we support you in exceeding client expectations — from concept to commercialization.

Enabling your success

CDMOs must confidently deliver therapies while controlling costs in a globally competitive environment, keeping up with changing global regulatory standards, and staying flexible and scalable to meet clients' evolving needs. Selecting the right partner is critical to enabling your ambition to secure a distinctive position in the dynamic pharmaceutical industry.

You need a partner that can deliver:

Innovation

Advanced technologies and products to propel you forward and keep pace with the industry's evolving needs

Productivity

Solutions that expedite timelines, optimize resource utilization, and reduce costs — without compromising results

Quality

Meeting the highest standards with superior practices and products at every stage

Your partner from concept to commercialization

We know your clients' needs can be dynamic and span the entire development and manufacturing process. You need a partner who can be flexible and meet you where you need support, all while providing products, capabilities, and services that are widely trusted. Thermo Fisher can be that partner no matter where you are in that process.

Pre-formulation

Advanced analytical products and services to produce the data critical to selecting the most promising drug candidate

Clinical phase

Adaptable solutions for delivering clinical trial materials, including streamlining processes, maintaining quality standards, and navigating regulatory requirements

Manufacturing

Efficient and scalable manufacturing processes to propel your client's pharmaceutical innovations to market

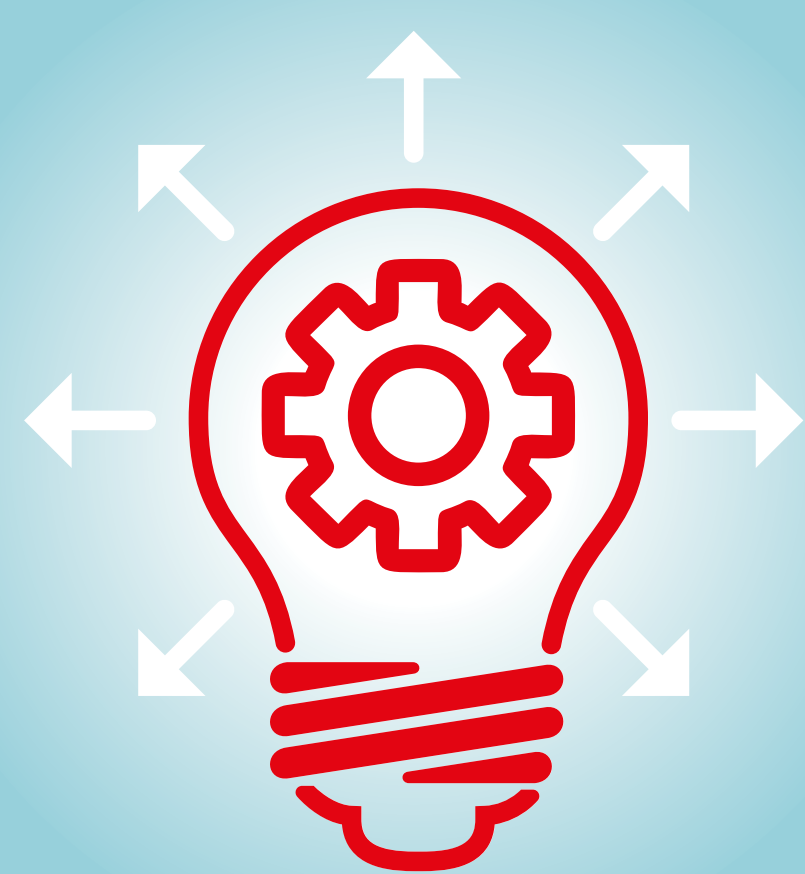

Formulation

Collaboration to advance your drug product to its final form for clinical trials

Packaging

Global experience to confidently navigate the complexities of drug packaging, ensuring the safety, integrity, and compliance of the product

Industry knowledge and tailored solutions to meet your dynamic needs

Thermo Fisher Scientific supports a diverse array of drug modalities, including small molecules, biologics, cell and gene therapies, mRNA, oligonucleotides, and more, providing solutions in all phases of development and manufacturing, including:

- Regulatory, quality, and compliance support
- Assistance to enable scalability
- Innovative product and service offerings
- Efficiency and resource optimization
- Comprehensive solutions across your business

Our experience in practice

50+ years

of experience in
drug manufacturing

More than

40 years

of support in
clinical phases

Currently in

partnership with the
top 10 CDMO companies

Through our focus on delivering innovative capabilities and services, we know we can provide the dynamic partnership and support you need throughout the drug development and manufacturing process. Together, we can enable you to exceed your clients' expectations in delivering their life-changing therapies to patients.
