

# Protect your lab equipment and your budget. We've got your back.

Choose our Academic service membership to minimize costs when services are needed.

Academic labs are the driving force behind innovation and discovery, yet budgets often remain limited for protecting critical lab equipment. Without proper maintenance and repair services, labs risk facing unexpected or high repair costs when equipment issues arise—threatening both research progress and operational continuity.

That's why we've developed a budget-conscious service membership specifically for academic labs. The Unity™ Lab Services Academic service membership gives labs discounts on key services when equipment is more prone to incurring high maintenance and repair costs—after the factory warranty period.

## Why choose the Academic service membership?

- ✓ Purpose-built for higher education labs with limited budgets
- ✓ Reduces risk and costs associated with equipment failures
- ✓ Additional savings with volume-based discounts
- ✓ Flexible single- or multi-year membership with low upfront cost per unit of equipment for easier planning

## Plan entitlements at a glance

The Academic service membership provides peace of mind that if and when services are needed, costs associated with maintenance and repair are better controlled.

Post-warranty period	
Academic service membership	
<b>Equipment repair</b>	
Travel, labor, and materials	25% discount
Repair warranty	1 year
On-site response commitment	Standard
<b>Maintenance services</b>	
Diagnostic inspection*	45% discount
Preventive maintenance	25% discount
<b>Education</b>	
Access to eLearning courses**	✓

\* Diagnostic inspection is an on-site maintenance service that verifies and provides comprehensive documentation on the operating condition of the unit. Diagnostic inspection is only available for cold storage (refrigerators and freezers), CO<sub>2</sub> incubators, and centrifuges.

\*\* eLearning courses are available for selected lab equipment, including biological safety cabinets, centrifuges, cold storage (freezers and refrigerators), incubators, and water purification systems. Please contact your sales representative for more information.

## Equipment we service

Our Academic service membership is available for a variety of Thermo Scientific™ equipment. In some cases, we may also be able to offer our membership for equipment from other manufacturers.

- Biological safety cabinets
- Centrifuges
- CO<sub>2</sub> incubators
- Cold storage (freezers and refrigerators)
- Environmental chambers
- Immersion coolers and circulators
- Microbiological incubators
- Ovens
- pH meters
- Recirculating chillers
- Remote monitoring products
- Shakers
- Water baths

## Smarter coverage for academic labs

Investing in an Academic service membership means you can focus on advancing research without worrying about service expenses. With flexible, cost-saving coverage designed specifically for the needs of academic labs, you'll gain greater control over your budget while helping ensure that your essential equipment stays up and running.

Please contact your sales representative for more information or to request a quote.
