## Product Specific Information

PA5-33199 has been tested and found to be negative on the following rat tissues - peripheral blood leucocytes, thymocytes, splenocytes and macrophages. PA5-33199 recognizes the human CD45RA antigen, and therefore human leucocytes may be used as a positive control for this product. This antibody is not suitable for use as a negative control on human tissues.

For FACS analysis, use 10 µL of the suggested working dilution to label 1x10<sup>6</sup> cells in 100 µL.

For Research Use Only. Not for use in diagnostic procedures. Not for resale without express authorization. Products are warranted to operate or perform substantially in conformance with published Product specifications in effect at the time of sale, as set forth in the Production documentation, specifications and/or accompanying package inserts ("Documentation"). No claim of suitability for use in applications regulated by FDA is made. The warranty provided herein is valid only when used by properly trained individuals. Unless otherwise stated in the Documentation, this warranty is limited to one year from date of shipment when the Product is subjected to normal, proper and intended usage.
