Vimentin Polyclonal Antibody

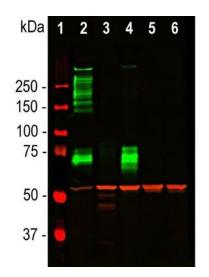

Product Details

Size	100 μL
Species Reactivity	Bovine, Dog, Chicken, Horse, Human, Mouse, Pig, Rat
Published Species	Mouse, Human
Host/Isotype	Chicken / IgY
Class	Polyclonal
Туре	Antibody
Conjugate	Unconjugated
Immunogen	The immunogen used to generate our antibody was recombinant vimentin purified from E. coli.
Form	Liquid
Concentration	16.6 mg/mL
Purification	IgY fraction
Storage buffer	PBS
Contains	5mM sodium azide
Storage conditions	Store at 4°C short term. For long term storage, store at -20°C, avoiding freeze/thaw cycles.
RRID	AB_2257294

Applications	Tested Dilution	Publications
Western Blot (WB)	1:10,000-1:20,000	-
Immunohistochemistry (IHC)	-	7 Publications
Immunohistochemistry (Paraffin) (IHC (P))	1:150	-
Immunohistochemistry (Frozen) (IHC (F))	Assay-Dependent	-
Immunocytochemistry (ICC/IF)	1:200-1:5000	1 Publication

Product Images For Vimentin Polyclonal Antibody

Vimentin Antibody (PA1-16759) in WB

Western blot analysis of Vimentin in tissue and cell lysates. Samples were incubated in Vimentin polyclonal antibody (Product # PA1-16759 using a dilution of 1:5000. Antibody in red. [1] protein standard (red), [2] rat whole brain lysate, [3] HeLa, [4] SH-SY5Y, [5] HEK293, and [6] NIH-3T3 cell lysates. NB300-223 binds to the vimentin protein showing a single band at ~50 kDa. The blot was simultaneously probed with mouse mAb to MAP2C/D, dilution 1:5000 in green, revealing multiple bands around 280 kDa that correspond to full length MAP2A /2B isotypes, and ~70 kDa bands which are MAP2C/D isotypes. MAP2 isotypes are seen only in extracts containing neuronal lineage cells.

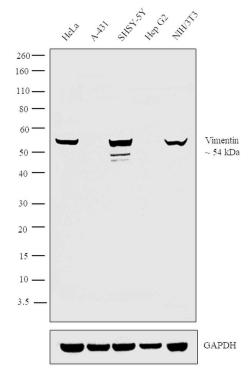

Vimentin Antibody (PA1-16759)

Antibody specificity was demonstrated by detection of differential basal expression of the target across cell models owing to their inherent genetic constitution. Immunofluorescence analysis using Vimentin Polyclonal Antibody (Product # PA1-16759) showed expression of Vimentin in HeLa compared to A-431. {RE}

Vimentin Antibody (PA1-16759) in WB

Western blot analysis was performed on Whole cell extracts (30 μ g lysate) of HeLa (Lane 1), A-431 (Lane 2), SHSY-5Y (Lane 3), Hep G2 (Lane 4) and NIH /3T3 (Lane 5). The blot was probed with Anti-Vimentin Polyclonal Antibody (Product # PA1-16759, 1:2000 dilution) and detected by chemiluminescence using Goat anti-Chicken IgY (H+L) Secondary Antibody, HRP (Product # A16054, 0.25 μ g/ml, 1:4000 dilution). A 54 kDa band corresponding to Vimentin was observed across all the cell lines positive for Vimentin (Lanes 1, 3 and 5), while this band was absent in the cell lines which do not express Vimentin protein (Lanes 2 and 4).
