Product Specific Information

The mature, soluble form of mouse TNF-alpha was expressed in Pichia pastoris, KM71H. GenBank Accession # P06804, amino acids 80 - 235. For protein verification, the expressed protein was N-terminal sequenced and begins with the following 10 amino acids: LRSSSQNSSD. Purity is >95% by SDS-PAGE analyses.

Activity: The biological activity of recombinant mouse TNFa was measured by its cytolytic effect on mouse WEHI-13VAR cells in the presence of Actinomycin D.

Use: For in vitro applications. A dose-response assay should be performed to determine the optimal concentration for specific experiments.

Reconstitution and Dilution: Store lyophilized material at 4°C. Reconstitute in 0.5 mL of distilled or deionized water. Dilute in a buffer-containing carrier protein, aliquot, and store at or below -70°C, avoiding multiple freeze-thaw cycles. PBS with 1% BSA or a neutral media containing <10% FCS are suitable buffers.

Mouse TNF-alpha Protein (RMTNFAI) in ELISA
Cytotoxicity Bioassay Analysis of Murine TNF-alpha was performed by resuspending 929 cells in 10% Horse Serum. Six thousand cells per well (passage 8, in 100 µL volume) were transferred to assay plate and incubated overnight at 37°C. Mouse TNF-alpha Recombinant Protein (Product # RMTNFAI), was serially diluted 1:4 in triplicate starting from a concentration of 100 ng/mL in assay media containing 1 µg/mL Actinomycin D, 2X Gentamicin and 10% Horse Serum, and 100 µL was added to each well. The plate was incubated for 23 hours at 37°C and then analyzed via a colorimetric method to determine cell viability and read at 490 nm.
